RE: Channel Maintenance Permit.

Dear Bill:

Would you please provide us with your new Fish & Game permit so that we may include its provisions into our channel maintenance permit.

We would like to issue this as rapidly as possible.

Respectfully,

Frederick L. Barnett,
Director of Public Works

FLB:mpg.

date of receipt in which to make its recommendations.

Notification No. _____ Received _____
(Not to be filled in by applicant)

STATE OF CALIFORNIA
RESOURCES AGENCY
DEPARTMENT OF FISH AND GAME

NOTIFICATION OF REMOVAL OF MATERIALS AND/OR ALTERATION
OF LAKE, RIVER, OR STREAMBED BOTTOM, OR MARGIN

A. APPLICANT

Pursuant to Section 1601 or 1602 of the California Fish and Game Code

I, William J. Zisk of 205 THOMAS ST. ROSEVILLE,
Name of applicant Mailing address

Representing _____
(Name of agency, company, etc.)

Hereby notify the California Department of Fish and Game of operations to be carried out by me, or the organization I represent,

From MAY 31, 1973 to OCT. 15, 1973
Date Date

DRY CREEK of PLACER County
Name of stream, river, or lake

in the _____ 1/4 Section _____ Township 11 N Range 6 E
NE, NW, SE, or SW

(Complete site description on reverse side of the second sheet)

The owner of the property is WILLIAM J. & LOIS E. ZISK

whose address is 205 THOMAS STREET, ROSEVILLE, CALIF. 95678

William J. Zisk is responsible for operations at the site.
(Name of person to be contacted at site during operations)

He can be reached at 205 THOMAS STREET, ROSEVILLE, CALIF.
Mailing address

Telephone No. 916 - 787 2233

B. DESCRIPTION OF OPERATION

1. The nature of said operations will be as follows: (Check all squares which apply)

A. Soil, sand, gravel, and/or boulder removal or displacement. (If checked, complete items 1, 2, and 3 below as applicable.) 12.

B. Water diversion or impoundment. (If checked, complete items 1, 2, 3, and 4 below as applicable.) 13.

C. Mining — other than aggregate removal. (If checked, complete items 2, 3, and 5 below as applicable.) 14.

D. Road or bridge construction. (If checked, complete items 1, 2, and 3 below as applicable.) 15.

E. Logging. (If checked, complete items 3 and 5 below as applicable.) 16.

F. Temporary, recreational or irrigation dam. 17.

Item No. 1. — Volume of sand, gravel, and/or boulders to be removed, displaced or added during time period covered in this notification. 20.

Describe: APPROX. 2000 YDS

Item No. 2. — Type of material removed or displaced

Soil 21.

Sand 22.

Gravel 23.

Boulders 24.

Item No. 3. — Equipment to be used in the described site

Bulldozer, cat, logging arch, etc. 25.

Dragline 26.

Bucket dredge or suction dredge 27.

Other (Describe) RUBBER TIRED FRONT END LOADER 28.

Item No. 4. — Use of water (i.e., domestic, irrigation, gravel, washing, etc.) 29.

Describe: _____

Item No. 5. — Material not covered in Item No. 1

A. Describe type of solid material which will enter or be deposited in the stream or lake as a result of this operation: 30.

B. Estimate quantity of material which will enter or be deposited in the body of water as a result of this operation: 31.

Item No. 6. — Describe type and density of vegetation to be affected, and estimate area involved. 32.
If no vegetation involved, write "None."

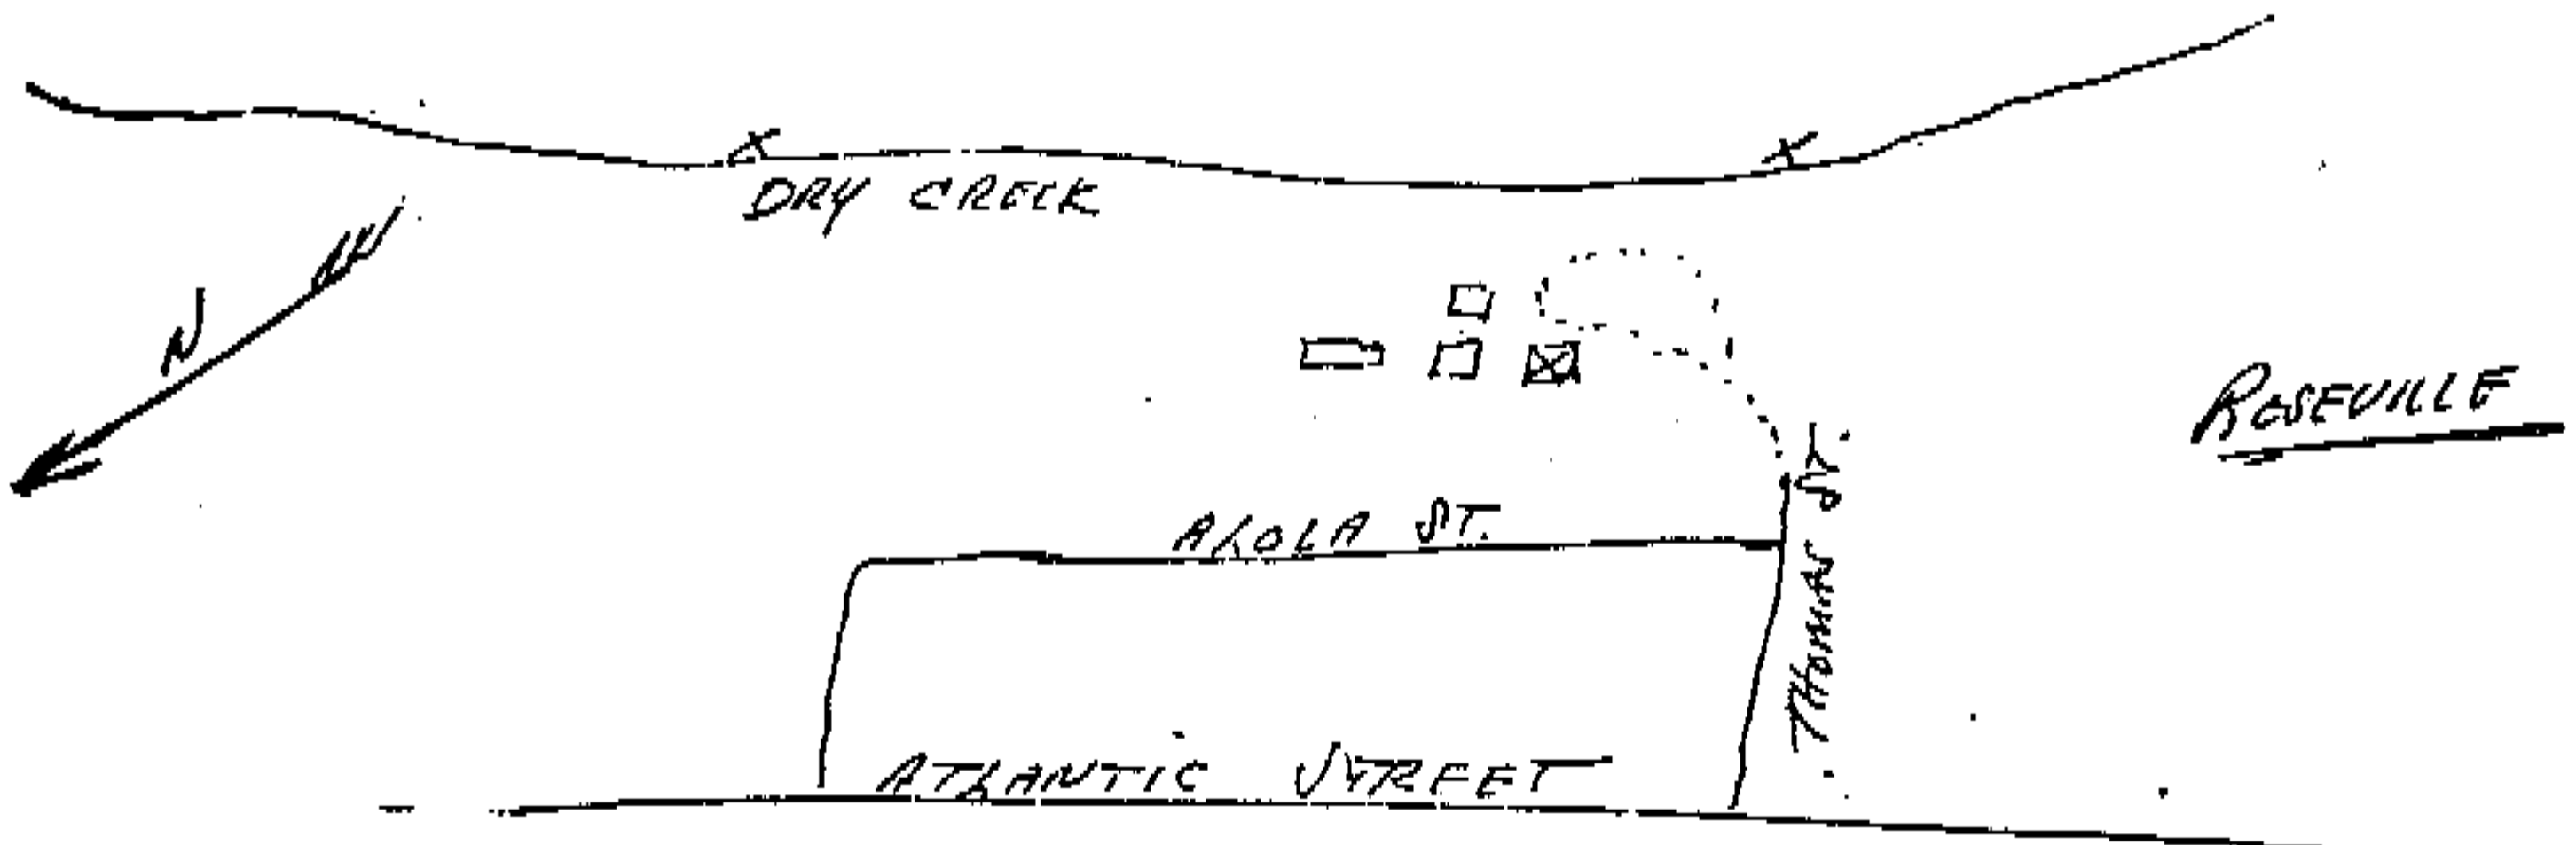

A SMALL AMOUNT OF WILLOW + BLACKBERRY VINES
TO BE REMOVED - RESEED GRASS IN DISTURBED AREA

2. Briefly describe proposed construction methods. 33.

A DRAGLINE WILL BE USED TO REMOVE OBSTRUCTING SAND BAR
— SHOPE CREEK BANK — AND RESTORE STREAM POOL AREA,
A RUBBER TYPED FRONT END LEADER WILL BE USED
TO DISTRIBUTE EXCAVATED MATERIAL INTO LOW AREAS

C. SKETCH MAP

Diagram or sketch below the location of your operation to clearly indicate the stream or other water and 34. 5.
access from named public road. Indicate locked gates with an X. Show compass direction.

William A. Zick
Signature of Applicant

Date: MAY 21, 1973

AGREEMENT REGARDING STREAMBED ALTERATION NOTIFICATION

THIS AGREEMENT, entered into between the State of California Department of Fish and Game, hereinafter called the Department, and Mr. William J. Zisk of 205 Thomas St. Roseville, State of Calif, hereinafter called the operator, is as follows:

WHEREAS, pursuant to Section 166102 of California Fish and Game Code, the operator, on the 22nd day of May, 1973, notified the Department that he intends to substantially divert or obstruct the natural flow of, or substantially change the bed, channel, or bank of, or use material from the streambed of, the following water:

Dry Creek
in the County of Placer, State of California.

WHEREAS, the Department hereby certifies that an inspection of subject area was made on the 24th day of May, 1973, by the following Department personnel: Wfn. H. B. Holzapfel and it was determined that an existing fish or wildlife resource may be adversely affected by such operations.

THEREFORE, the Department hereby proposes measures to protect fish and wildlife during the operator's work. The specific recommendations which apply to this operation and which the operator hereby agrees to accept as part of his work are as follows: numbers 1, 2, 3, 4, 5, 6, 7, 8 from the list below.

1. Disturbance or removal of vegetation shall not exceed the minimum necessary to complete operations. The disturbed portions of any stream channel within the high water mark of the stream shall be restored to as near their original conditions as possible.

2. Installation of bridges, culverts, or other structures shall be such that the water flow is not impaired and upstream or downstream passage of fish is assured during migration periods, which are specified as follows: Bottoms of temporary culverts shall be placed at or below stream channel grade. Bottoms of permanent culverts shall be placed below stream channel grade.

3. Design of concrete sills and other features that could potentially impede fish migration must be approved by Department engineers. Submit plans of _____ for approval and/or recommended change.

4. Where working areas encroach on streambeds, every effort shall be made to avoid increasing turbidity in the stream, if flowing, or to prevent turbidity when flows occur. In this regard, the following measures shall be taken.
- (a) Equipment shall not be operated in the stream channels of flowing live streams except during excavation operations and as may be necessary to construct crossings or barriers and fills at channel changes. If work in a flowing stream is unavoidable, the stream shall be diverted around the work area by a barrier, temporary culvert, and/or a new channel. Construction of the barrier and/or the new channel shall normally begin in the downstream area and continue in an upstream direction, and the flow shall be diverted only when construction of the diversion is completed. Channel bank or barrier construction shall be adequate to prevent seepage into or from the work area. Channel banks or barriers shall not be made of earth or other substances subject to erosion unless first enclosed by sheet piling, rock riprap, or other protective material. The enclosure and the supportive material shall be removed when the work is completed and the removal shall normally proceed from downstream in an upstream direction.
 - (b) Preparation shall be made so that runoff from steep, erodible surfaces will be diverted into stable areas with little erosion potential. Frequent water checks shall be placed on dirt roads, cat tracks, or other work trails to control erosion.
 - (c) Spoil, debris, or other material shall not be deposited in stream channels. Such material shall be placed in disposal areas where it will not be washed into streams. Wash water containing mud or silt from aggregate washing or other operations shall not be allowed to enter flowing streams.
 - (d) A barrier, adequate to prevent the flow of muddy water into a stream shall be maintained between the area being excavated and the stream. If, however, the entrance of mud or silt from marginal activity into a stream cannot be prevented, a sediment catchment basin shall be constructed across the stream immediately below the operation. The dam, plus entrapped sediment from stream channel, shall be removed when operation is terminated.
 - (e) If operations require moving of equipment across a flowing stream, such operations shall be conducted without increasing stream turbidity. For repeated crossings, the operator shall install a bridge, culvert, or rock-fill crossing.
5. If a stream channel has been altered during the operations, its low flow channel shall be returned as nearly as possible to its natural state without creating a possible future bank erosion problem, or a flat wide channel or sluice-like area. The gradient of the streambed shall be as nearly as possible the same gradient as existed prior to disturbance.

6. All work in or near streams shall be confined to the period June 1, 1973
to Oct. 1, 1973

7. Structures and associated materials not designed to withstand high seasonal flows shall be removed to areas above the high water mark by Oct. 1, 1973

8. No debris, soil, silt, sand, rubbish, or Portland cement or concrete or washings thereof, shall be allowed to enter into, or placed where it may be washed by rainfall or runoff into, waters of the State in quantities deleterious to fish or wildlife. When operations are completed, any excess materials or debris shall be removed from the work area. No rubbish shall be deposited within 150 feet of the high water mark of any stream.

If the operator's work changes from that as stated in his notification specified above, this agreement is no longer valid. The operator shall submit a new notification of his proposed work to the Department pursuant to the California Fish and Game Code. Failure to comply with the provisions of this agreement and with other pertinent code sections, including but not limited to Fish and Game Code Sections 5650, 5652 and 5946, may result in prosecution.

Nothing in this agreement authorizes the operator to trespass on any land or property, nor does it relieve the operator of responsibility for compliance with applicable federal, state, or local laws or ordinances.

Notification No. II-86-73
Date Received 5/22/73

Mr. William L. Zisk
205 Thomas Street
Roseville, California

Dear Mr. Zisk:

We have received your notification of proposed operations on
Dry Creek of Placer
County in the _____^k, Section _____
Township 11N, Range 6E

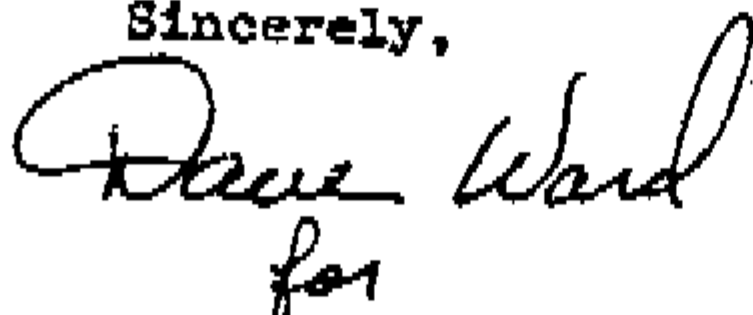

Your proposed operation has been given notification number
II-86-73, and assigned to a Department representative who
will contact you soon.

Under provisions of the Fish and Game Code, you may not begin work
on your proposed project until the Department has conducted an
inspection and its recommendations (or, if an agreement cannot
be reached, the decision of an arbitration panel) have been
incorporated into your project.

These provisions of the Fish and Game Code are intended to
protect and conserve California's fish and wildlife resources.

We look forward to working with you.

Sincerely,

for
Robert W. Lassen
Regional Manager

Dear Mr. Zisk:

Thank you for your cooperation in completing the agreement related to your dragline operation in Dry Creek.

If, as your work proceeds, you wish to consult with a department representative, please contact Warden Holsapple directly.

Sincerely,

A handwritten signature in cursive script that reads "Robert W. Lassen".
